GETTING STARTED

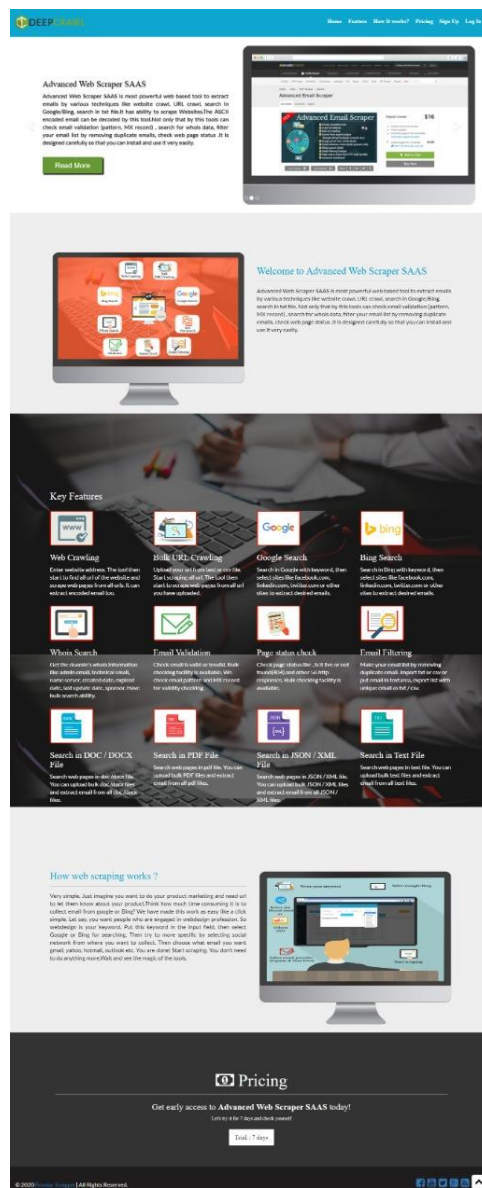

Deep Crawl Provide his users to a friendly environment for Crawl full website, for crawl bulk, URL, uploading it from txt/csv file. It can decrypt encoded email. So no problem to scrape encrypted email.

LOGIN AND REGISTRATION OF USER

First of all, for crawling user registration and login is required.

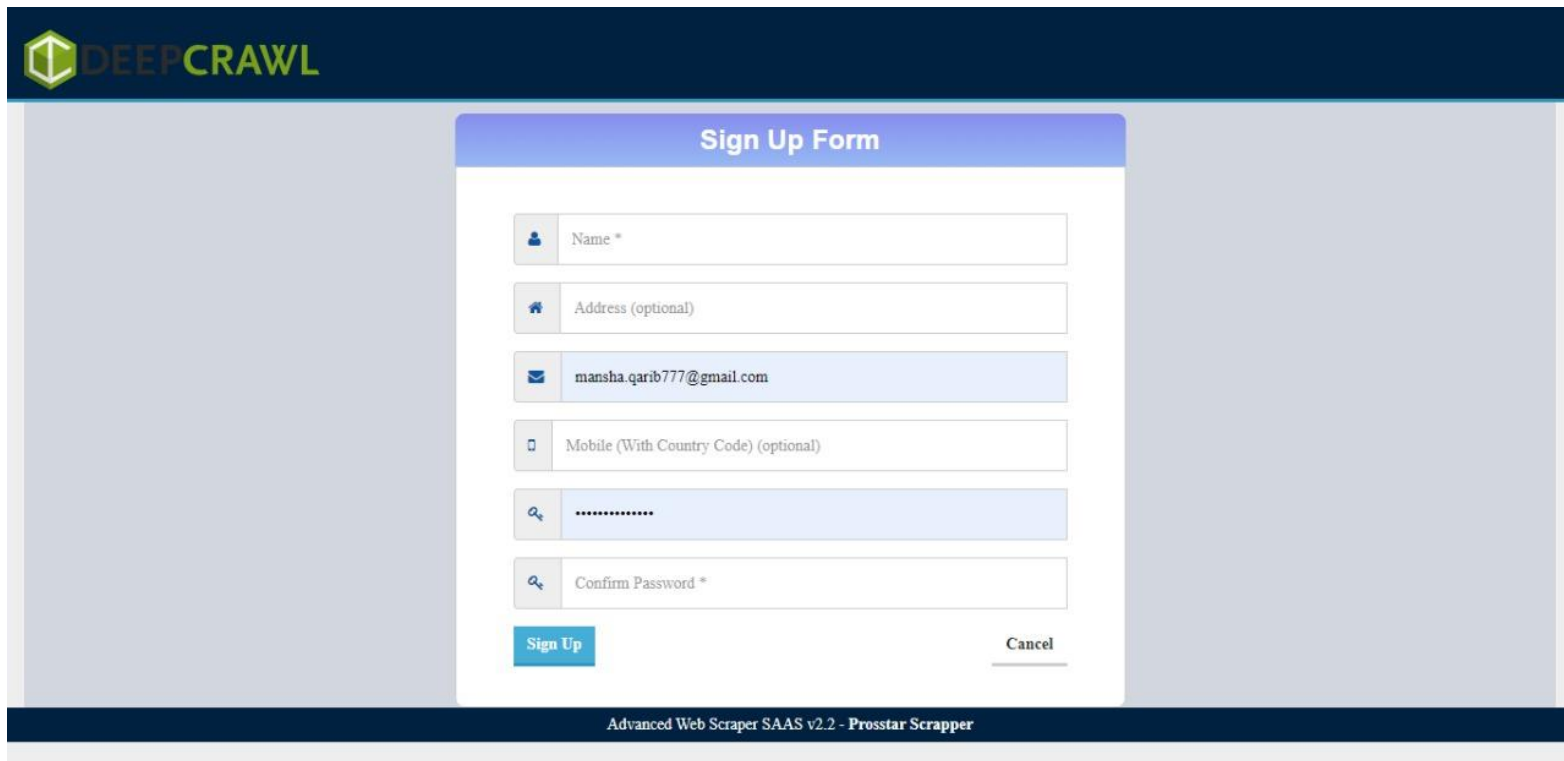

USER REGISTRATION

To crawl any website and URL, the first step is the Registration of a user who want to extract data from a website. To do so, navigate to the “Dashboard” panel and click the “Signup” button.

The Signup Form will appear, where the user will enter into the text box the name, address, email, password and

confirm password. Then simply press the “Signup” button and the User Registration is done and “cancel” button cancel it and goes back to Dashboard.

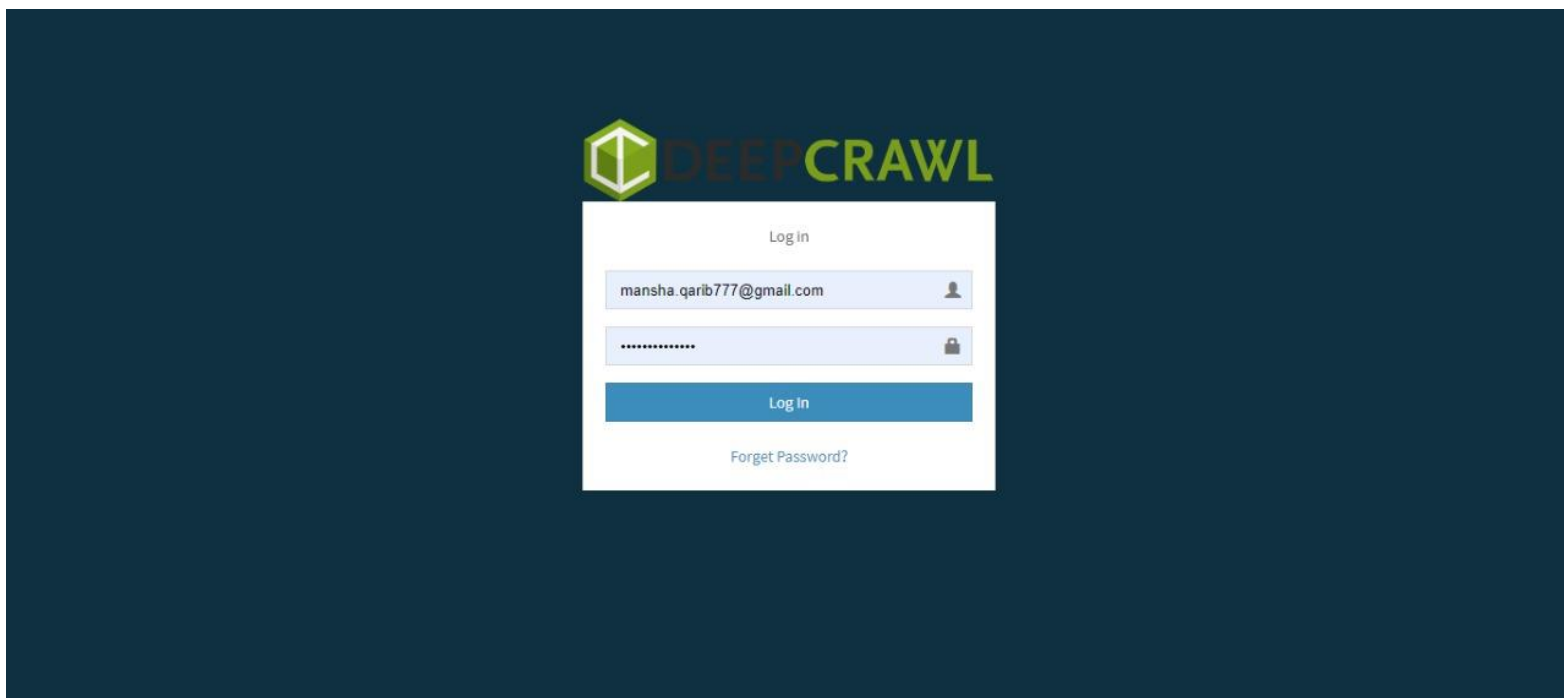

The screenshot shows the DEEPCRAWL Sign Up Form. The form is titled "Sign Up Form" and is set against a dark blue header with the DEEPCRAWL logo. The form fields include: Name *, Address (optional), Email (mansha.qarib777@gmail.com), Mobile (With Country Code) (optional), Password (masked with dots), and Confirm Password *. There are "Sign Up" and "Cancel" buttons at the bottom. The footer text reads "Advanced Web Scraper SAAS v2.2 - Prosstar Scraper".

User Login

After the registration of the user, you are required to login. If you are already registered then go to “Dashboard” and Click the “login” button.

Otherwise when you register automatically go to login page.

In login page you have to give email and password that you are using in the registration process.

The screenshot shows the DEEPCRAWL Log In Form. The form is titled "Log In" and is set against a dark blue header with the DEEPCRAWL logo. The form fields include: Email (mansha.qarib777@gmail.com) and Password (masked with dots). There is a "Log In" button and a "Forgot Password?" link at the bottom.

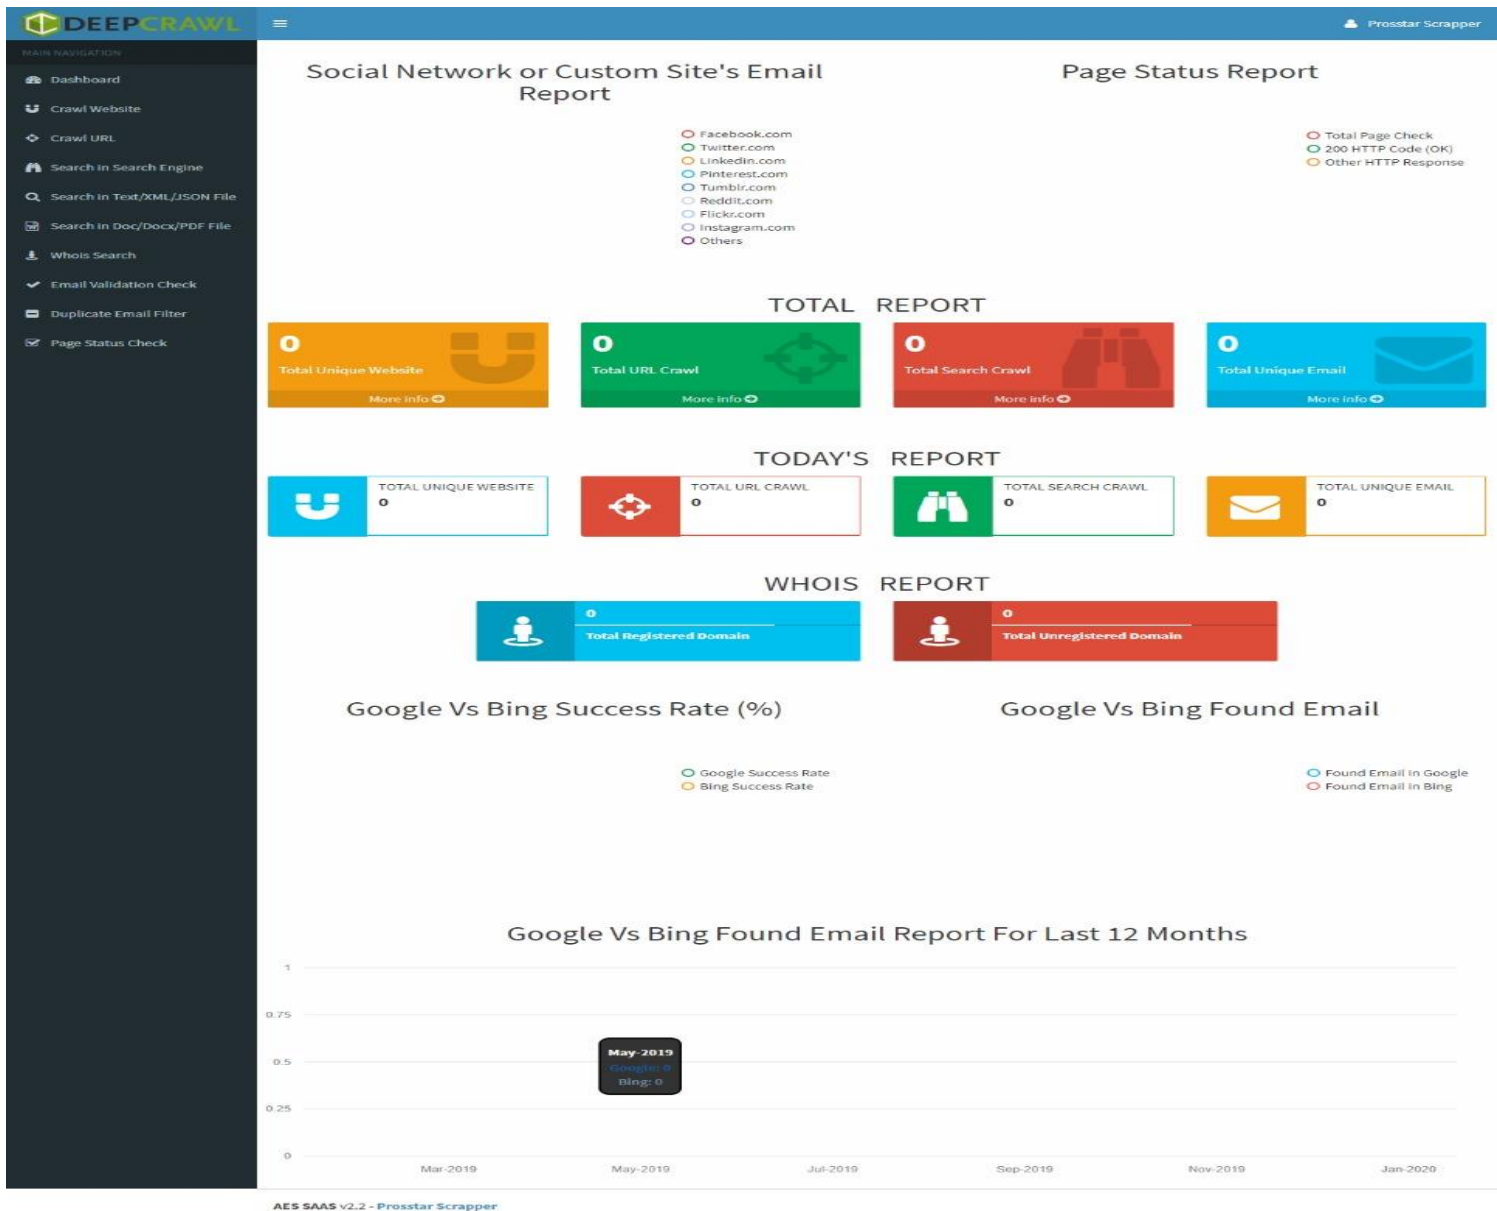

Then click on the login button and you will be logged in.

You are also reset password if you forget the password on clicking the button "Forget Password" below the login Button.

User Control Panel

After logged in, user goes to its control panel which shows all the activities that have been done before. Also it tells us about the history of the crawl and the website, URL and emails that you crawl by the DEEP CRAWL.

As you see in the dashboard there are many ways of scraping and you can also see the Report Status

In report status page you can check Total report, report of the day and who is report.

There is a side navigation panel from which you can navigate to different search and also to the main dashboard Of the DEEP CRAWL.

On the Right top side of the panel logged in user information is given from which he can also logout the account.

CRAWL URL

In the user control panel click on the “CRAWL URL” navigation button then a screen shows that crawl the URL. In this search box you have to write or paste the link you have to crawl, also give the from and to date the data you have to Extract. After that click on the “Search” button to extract data from the URL that you have given in the search box.

The screenshot shows the DEEPCRAWL application interface. On the left is a dark sidebar with a 'MAIN NAVIGATION' menu containing: Dashboard, Crawl Website, Crawl URL, Search in Search Engine, Search in Text/XML/JSON File, Search in Doc/Docx/PDF File, Whois Search, Email Validation Check, Duplicate Email Filter, and Page Status Check. The main content area is titled 'URL Search' and features a search form with fields for 'URL', 'From Date', and 'To Date', along with a 'Search' button. Above the form are three buttons: 'New Search' (blue), 'Delete' (red), 'Download Email With URL' (orange), and 'Email Download' (orange). Below the form is a table with columns: 'URL', 'Last Scraped Time', 'Found Email', and 'Details'. The table is currently empty. At the bottom of the table area, there is a pagination control showing 'Page 0 of 0' and a status message 'Displaying 0 to 0 of 0 items'. The footer of the page reads 'AES SAAS v2.2 - Prosstar Scraper'.

Also you can delete or download the data that the DEEP CRAWL extract from the URL that you have given. There is a delete button that clear the searched data. And “New Search” button allow you to search a new URL that you want to extract data.

SEARCH ENGINE SEARCH

The search engine search used for the search and extract the data by using search engines like Google, BING And Yahoo etc.

When you enter the search keyword in the search box. Crawler search for the given text and extract data by Using the Search Engine and show the data in the body of the extracted data area.

You can also download that data by clicking on the download button and after that clicking the Delete button To clear the searched area.
